**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1,3,27,29, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Narin (US 5,292,020).

See figure 2 depicting the container thread between the closure thread 34 and the anti-backoff element 44. A lead angle of the anti-backoff member is different from a lead angle of the thread can be seen in figures 3-6. The plastic material inherently has flexibility when pressure is applied thereto such that deflection occurs.

***Claim Rejections - 35 USC § 103***

3. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Narin.

Narin teaches the claimed container except for the anti-backoff member being on the container. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the anti-backoff member on the container, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Narin in view of applicant's admission of known equivalents.

Narin teaches the claimed closure except for the threading being segmented into a plurality of circumferentially spaced closure threading groups.

Applicant admits a single helical thread and a plurality of thread segments are known in the art for engaging closure threading to container threading.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute a plurality of thread segments or groups in a group for the single thread of Narin as an obvious choice of known equivalents.

***Response to Arguments***

5. Applicant's arguments filed November 20, 2003 have been fully considered but they are not persuasive.

Applicant asserts Narin is silent regarding the anti-backoff member being flexible and "arranged and configured to deflect". However, it is known that plastic material is flexibility and will deflect upon application of pressure thereto. Thus, the anti-backoff member of Narin is flexible and is "arranged and configured to deflect".

***Allowable Subject Matter***

6. Claims 5,12-26,30 and 33 are allowed over the art of record.

7. Claims 2,4, and 7-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

9. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top

of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

10. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. \_\_\_\_\_ is being facsimiled to The U.S. Patent and Trademark Office via fax number (703) 872-7306 on the date shown below:
